DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 21, 27, 28, 38 and 40 are rejected under 35 U.S.C. 102(b) as being anticipated by Peterson et al. (U.S. Patent 3,712,589).

Peterson et al. discloses a road safety barrier including a resistant element (Figure 3, for example) having two vertical walls (8) with a foot and seat (beneath the structure). There is a dampening element (2) inserted in and rigidly connected to the seat (Figure 3); thereby forming a socle at the foot. Because the dampening element is open along the sides, it meets the recitation of positioned facing a carriageway. The dampening element is deformable (Figures 2 and 4, for example) and has a lower resistance to impact than the resistant element.

Regarding claim 27, there are supports and screw anchors.

Regarding claim 28, plate (12) meets the claim recitations since it is intermediate the supports and resistant element and inherently has frictional properties associated therewith.

Regarding claim 38, the shape shown in Figure 3 substantially corresponds to a cross sectional shape of a New Jersey barrier.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 23, 24, 30, 32 and 39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Peterson et al., as applied above.

Regarding claims 23, 24 and 32, these materials are all well known for use in road safety barriers. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used any of them in order to obtain a desired degree of impact resistance, as is known in the art.

Regarding claims 30 and 39, it is well known to use screens and noise absorbers with roadside structures; therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have accommodated the structure of Peterson et al. to incorporate these devices in order to minimize noise pollution to areas adjacent the roadway.

Allowable Subject Matter

5. Claims 22, 25, 26 and 29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments filed March 31, 2004 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

8. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
